

smartnav™

A PACCAR COMPANY

Peterbilt's Premium interiors features the revolutionary new SmartNav system, an in-dash telematics and infotainment system specifically designed for the truck industry. SmartNav features a 7-inch touch screen that provides real-time vehicle monitoring, truck navigation, hands-free Bluetooth connectivity, voice recognition, an integrated audio system with satellite radio as well as MP3 and iPod capabilities with an internal storage space of 8 GIG's. No other system exists in the market today that provides customers this level of diagnostic, communication and entertainment functionality.

A PACCAR COMPANY

Truck Monitoring – Six virtual gauges provide real-time measurements of vehicle data such as fuel flow rate, pressure and horsepower usage and helps the driver monitor the system when warnings are displayed using the J1939 SAE standard. Drivers can also view up to 4 cameras that can be attached to the vehicle as well as a hybrid monitoring system when applicable.

Telematics – For customers with a modem, use the touch screen to open the internet browser to easily connect with Peterbilt Customer Care, PACCAR Parts or PACCAR Financial.

Navigation – The Garmin truck-specific navigation system maps routes that consider trucking parameters, such as bridge heights and weight restrictions. This PACCAR-exclusive feature also highlights Peterbilt-specific points of interest.

Phone – Fully voice-recognition enabled, the phone feature logs calls and stores contact information for those using a Bluetooth device.

Audio System – The unit features AM/FM/Weather bands, radio data streaming, Sirius satellite radio for subscribers, a CD player, USB port for memory devices containing MP3 or audio files, iPod capabilities and Bluetooth A2DP audio streaming from enabled Bluetooth devices.

Tools – A calculator and alarm clock are available, as well as a video feature, that allow the use of an external device, such as an iPod.

Setup – The driver can program the system's settings and controls as well as select a preferred language from English, Spanish (Mexico) and French (Canadian).
